COMPACTenna *New!* 20M/2M/440

A 20 inch antenna for 20 meters? Impossible! Until now ... The **COMPACTenna 20M/2M/440** represents a new reality. It uses a patented design which includes magnetic-field-enhancement. This allows the extremely short antenna to perform amazingly well for its height. Coverage includes 20 meters, 2 meters and 440 MHz! Power capacity is 100 Watts HF, 85 Watts 2m and 50 Watts 440. This break-through antenna was designed by Dr. Jack Nilsson N8NDL and offers superior performance on three popular amateur bands. This antenna requires a 3/8"-24 mount not included. PRAS

The **Heil PRAS Parametric Receive Audio System** is a state-of-the-art device that enhances the audio of amateur, shortwave, commercial and CB radios. It allows radio operators to modify, shape, and improve their receive audio using three separate equalization controls. The controls are easy to use. Midrange frequencies are the most critical for achieving clear voice articulation. Operators can adjust the parametric midrange filter ± 15 dB from 400Hz to 4kHz, with the recommended sweet spot being at 2.5 kHz. Combined with a low-frequency filter down to 160 Hz, and a high-frequency filter up to 6 kHz, you get unparalleled control and quality of your receive audio. The PRAS rear panel has three audio inputs: XLR and 1/8", and an 8 ohm input that can be used with the 8 ohm speaker output of any receiver. Includes Heil HPS-5 low-distortion, highly efficient Class D 24-watt amplifier with 5" low-frequency speaker mounted in a resonant sealed enclosure.
